Product Description

Hot Rolled Stainless Steel Coil 3-20mm Thickness AISI 430 304 316L

The construction

This was one of the earliest areas of stainless steel coil application. At present in the building decoration, the stainless steel coil plate is mainly used for the outer wall of the high-rise building, the internal and external column coating, the handrail, the floor, the elevator panel, the door and window, the curtain wall, the internal and external decoration and the work piece. After surface treatment, the color, coating of the stainless steel coil, solves the problem, such as fingerprints, after contact easily makes the stainless steel application range further expand.

Environmental protection industry

Industrial waste gas, waste and sewage treatment plants produce stainless steel coils. Resist sulfur dioxide flue gas desulfurization process, and chloride ion corrosion, iron ion, absorption tower, cooler, etc. Pump, valve, flue requires a duplex stainless steel coil and high-quality austenitic stainless steel coil.
